

The CONTENTS Procedure

Alphabetic List of Variables for WORK.CDC
age exerany gender genhlth height hlthplan smoke100 weight wt desire

The CONTENTS Procedure

Data Set Name	WORK.CDC	Observations	20000
Member Type	DATA	Variables	9
Engine	V9	Indexes	0
Created	11/11/2020 19:03:35	Observation Length	72
Last Modified	11/11/2020 19:03:35	Deleted Observations	0
Protection		Compressed	NO
Data Set Type		Sorted	NO
Label			
Data Representation	SOLARIS_X86_64, LINUX_X86_64, ALPHA_TRU64, LINUX_IA64		
Encoding	utf-8 Unicode (UTF-8)		

Engine/Host Dependent Information	
Data Set Page Size	65536
Number of Data Set Pages	23
First Data Page	1
Max Obs per Page	908
Obs in First Data Page	867
Number of Data Set Repairs	0
Filename	/tmp/SAS_work570600005A9A_10.0.2.15/SAS_work50A800005A9A_10.0.2.15/cdc.sas7bdat
Release Created	9.0401M6
Host Created	Linux
Inode Number	141429
Access Permission	rw-rw-r--
Owner Name	sasdemo
File Size	2MB
File Size (bytes)	1572864

Alphabetic List of Variables and Attributes

Answer

The chunk of the females that smoke less than 100 cigarettes is larger than the piece of males. Also, the chunk of males that smoke more than 100 cigarettes is larger than the piece of females.

The UNIVARIATE Procedure

Answer

The box plot shows how the bmi varies at every value of the genhlth variable.

Answer

Gender is a reliable choice for BMI. By definition, the BMI is related to weight and height, values that are influenced by the fact that a person is a man or a woman.

The UNIVARIATE Procedure
Variable: bmi

The UNIVARIATE Procedure

2. Create this new variable by subtracting the two columns in the new data set and assigning them to a new object named wdiff.

Description
The two variables increase the same way.

2. Create this new variable by subtracting the two columns in the new data set and assigning them to a new object named wdiff.

Obs	genhlth	exerany	hlthplan	smoke100	height	weight	wtdesire	age	gender	wdiff
1	good	0	1	1	64	125	115	33	f	-10
2	good	1	1	1	60	105	105	49	f	0

10	very good	0	0	1	64	105	120	27	f	15

4. Describe the distribution of `wdiff` in terms of its center, shape, and spread, including any plots you use. What does this tell us about how people feel about their current weight?

Type	<code>wdiff_equals_0</code>	<code>wdiff_positive_negative</code>
Both <code>wt_desire</code> and <code>weight</code> are numerical. Thus, the difference of the two variables is also numerical.	If <code>wdiff</code> is 0, then the person has the weight equal to the desired.	If <code>wdiff</code> is positive then the weight is smaller than the desired. Also if <code>wdiff</code> is negative then the weight is larger than the desired.

4. Describe the distribution of wdiff in terms of its center, shape, and spread, including any plots you use. What does this tell us about how people feel about their current weight?

The UNIVARIATE Procedure

5. Using numerical summaries and a side-by-side box plot, determine whether men tend to view their weight differently than women.

Answer

The distribution of wdiff tells us that the people have weight larger than the desired because the wdiff is negative.

5. Using numerical summaries and a side-by-side box plot, determine whether men tend to view their weight differently than women.
